RE-THINK / RE-ACT

Re-Think Re-Act is an Erasmus+ co-funded project. The project focuses on the INCLUSION of Secondary Education students with difficulties in adaptation and/or behaviour in the classroom due to poor training in SOFT SKILLS, which currently represents a real challenge for educational systems. These students often do not receive the appropriate educational response they need, either because they do not have the necessary resources for it or because they are unaware of their personal situation, which can lead to them being excluded from their group-classroom and from their center. education, and may even lead to early school leaving.

There are four results as part of this project which include:

Rethinking for Schools (RFS)
Educational centers find it difficult to detect shortcomings in meeting the needs of students, and limitations in their improvement strategies. Therefore, RFS is an ideal digital tool based on extensive analysis thanks to the capacity of collaborating partners, which provides information to establish areas of self-diagnosis and lines of work for educational management teams and managers.

Re-Act Webspace (RAW)
This is a free and open training platform for educational agents, and is an essential part of the Re-Think Re-Act ecosystem. Its contents can be used both formally and independently by teachers interested in soft skills. Thanks to the Re-Act Webspace, teachers, directors and specialised agents can start an upskilling process, training educational agents in aspects in which they have not been traditionally trained.
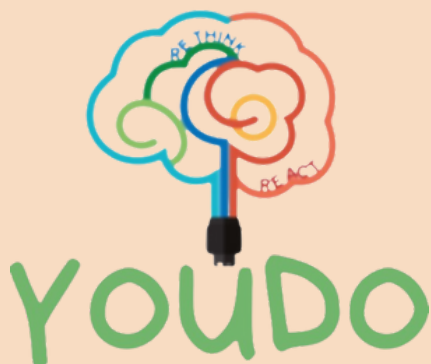

YOUDO

YOUDO is a digital resource with gamified interactive materials with a socialising component that facilitates self-knowledge by reinforcing skills related to emotional intelligence. Thanks to the game and overcoming challenges, the YOUDO user reflects and re-learns skills to face daily situations in which creativity, resilience, digital skills and other soft skills necessary for more meaningful and effective learning are required.

Together App (2Gapp)

The 2Gapp supports the ecosystem of Re-Think Re-Act results. It is the necessary piece for all the plans, training and resources of an educational organisation to have the desired effect. Through this app it is possible to follow the progress of the students in real time and alerts will be established for the personalised and synchronised attention of said students.
